

## Disinfection column

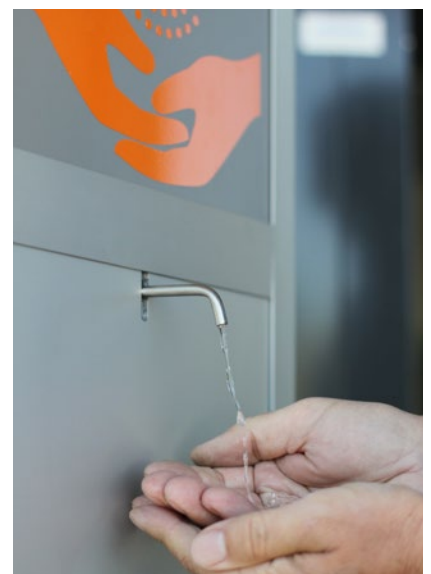

Regular hand disinfection is recommended by the federal government.

TOPP offers a disinfection column with a foot pedal for dispensing so that touching a handle is not required. This allows both hands to be disinfected at the same time. A drip pan keeps things tidy.

The column's modern, clear lines make it easy to clean.

Your name is applied to each column for promotional purposes. An optional information board or tablet can be added.

This disinfection column is designed to serve as an appealing, positive WELCOME for your customers in addition to ensuring hand hygiene.
